COUNTRY Indochina REPORT NC. 2  SUBJECT Fifth Month Harvest in Democratic Republic of Vietnam Zones No. OF PAGES 1	INFORMA	TION REPORT	This Document contains information affecting the Mational Defense of the United States, within the meaning of Title 18, Sections 793 and 794, of the U.S. Code, as amended. Its transmission or revelation of its contents to or receipt by an unauthorised person is prohibited by law. The reproduction of this form is prohibited.
SUBJECT Fifth Month Harvest in Democratic Republic of Vietnam Zones  25X1  DATE OF INFO.  PLACE ACQUIRED  THE SOURCE PARAMATIONS IN THIS SPORT ARE DEFINITIVE.  THE SOURCE PARAMATIONS IN THIS SPORT ARE DEFINITIVE.  THE APPRAISA OF CONTENT IS THIVATIVE.  25X11. The last fifth month harvest in the Democratic Republic of Vietnam (DRV) sone yielded two-thirds of the average in Interzone III and IV. It was possible to gather the harvest without being disturbed by military operations or without destroying it to prevent it from falling into enemy hands.  2. Because of the uncultivated area of land and the destruction of dams in Bai Thuong (N 19-53, E 105-22) and Do Luong, it is estimated that in Interzone IV the rice harvest is helf the normal yield and the harvest of other crops such as potatoes, maize, seeme, and beans, has increased as compared with other years by a ratio of three to two. The land became unsuitable for the cultivation of rice because the dams were destroyed, but it could be utilized to raise other crops, which explains this increase in productivity.  3. The harvest is the worst in the Viet Bac-Thai Nguyen, Tuyen Quang, and Phu Tho areas. The crops were partially destroyed by bombardment and by bad weather. It is estimated that two-thirds of the crop was lost. It vill be necessary this year to transport a great quantity of paddy from Interzones III and IV to the Viet Bac to supplement the shortage in this area.  4. For several months, the DRV has levied taxes on agriculture (thue nong nghiep), half of which are collected in money and the other half in kind. DRV cooperatives (Mau Dich) are buying paddy from the population at a relatively low price.  25X1  REQUIREMENT NO.  REQUIREMENT NO		CONFIDENTIAL	ZON   by law.
